

# Study at Covenant College Trades Skills Centre in 2022

The VET courses you can study with us include:

- **AHC20116 Certificate II Agriculture**
- **AHC20416 Certificate II Horticulture**
- **ACM20121 Certificate II Animal Care**

Note: Each course is a two-year program!

## How does the course contribution to my VCE/VCAL?

For Certificate II qualifications, credit at VCE is given at Unit 1 and 2 Levels. Each completed 90 nominal hours of training provides one VCE unit of credit. Credit accrues in the following sequence: units 1, 2, 1 and 2 up to a maximum of six VCE units.

**Where and when will the courses run?** Classes will run at the Covenant College Trades Skills Centre on Monday or Wednesday afternoons from 1:30pm to 5:30pm. Students will also travel to a range of workplaces throughout the Greater Geelong Region throughout the courses.

## How do I apply?

After discussing the course with a parent/guardian, students should complete and submit a VET application form, available from your school Careers and or VCE/VCAL Coordinator. For other enquiries email [Covenant TSC administration@covenant.vic.edu.au](mailto:Covenant_TSC_administration@covenant.vic.edu.au)

**Costs:** The course cost will be \$1,800 for one year (approximately). Students will also need to purchase a TSC uniform (\$70) and source their own steel capped work boots. Funding for students who wish to undertake a VET course is subsidised from the government, speak with your home school to discuss the out of pocket expenses you will occur.

**Structured workplace learning:** Students will also have the opportunity to learn whilst on placement in businesses throughout the region. We work hard to find placements in the areas of student passion and interest. On occasions, this may take place during school holidays. Of course parents/student will be notified of work placement details in advance.

## What does a typical day at the TSC look like?

Student engagement and retention in our courses is high and a positive aspect about studying with us is that we offer a 50/50 hands on and theory throughout the course. We also host guest speakers and attend excursions to various industry venues in the region to complement each of our courses.
